

Telesat's *Nimiq 2* was out of compliance more often than not during the study period.

During the study period from January 1, 2010, to December 31, 2021, *Nimiq 2* was in compliance with the physical portion of one of Canada's active space networks 36.4 percent of the time and out of compliance 63.6 percent of the time.
